<input type="checkbox"/> SIMQ_COPY_OPTIONS_SELECTED_BY_DEFAULT	Select All Copy Options Checkboxes by Default in SIMQ

Agreement Express - Enhancements

Access Protection Panel i18n for French and Spanish

Affected Workflow: All workflows with Access Protection in French and Spanish

Enhancement Description: The Access Protection Panel will appear fully in French and Spanish.

MV2 Enhancements

Signed User being Prompted to Save and Send on Open

Affected Workflow: Agreement Viewer fix. No specific workflow is affected.

Enhancement Description: Resolved an issue where sometimes a completed signer was being prompted for Save and Send when re-opening the transaction.

Resolved discrepancy between standalone and compound transaction styling

Affected Workflow: All compound transactions.

Enhancement Description: Resolves issue that could result in discrepancy between Case Transaction Signing Package themes. This means before the fix, the styling for a standalone transaction and a compound transaction could potentially be different. With this fix, it will no longer occur.

Offline Check - i18n Support

Affected Workflow: Agreement Viewer fix. No specific workflow is affected.

Enhancement Description: The Offline Check now supports French and Spanish as well.
