MV2 - ENHANCEMENTS

ID Verification Does Not Appear on Completion Report If ID Verification Configured Via NTC Group

A defect regarding the Completion Report (aka. Certification of Completion) not always showing ID Verification information has been resolved.

Optional Forms Bulk Send Updates to Publish Transaction

Bulk send with optional forms used to only work when publishing a transaction from a group FAB. Added the ability for optional forms to work when the FAB is set to other types.

UX - UI Optimization

Date Calendar when clicking outside of agreement

The date calendar will now close when clicking in any area of the browser, where as it was not closing previously.

Signing Process (iPad)

The black rectangle is no longer there when you scroll on an iPad. The Sig Pointer is no longer on top of the document selection panel on mobile screens.

Navigation bar inside documents has broken buttons

Updated behavior to download button, and removed the print icon from the Signing Document Navigation bar.

No Email Validation on Add User Panel

Email Validation has been added to the Add User Panel in the User Admin section.

Tooltips for Place Items FAB in Viewer

Fixed the bug of Tooltips not showing for FABs to place Signature blocks, Text fields etc. Also corrected their positioning on first hover.

i18n for Tool Tips for Place Items Fab in MV2 viewer

Added i18n support for Place Items FAB in MV2 viewer, French and Spanish.
