Agreement Express - Enhancements

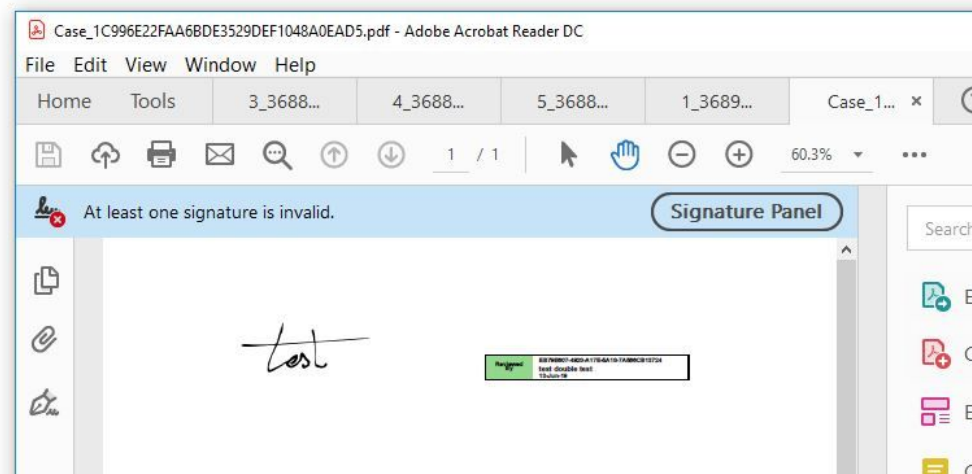

Fix Review Signature Block Behaviour in Printed/ Downloaded Form

Affected Workflow: Signing Documents that contain Review Signatures, as opposed to full signatures or initials.

Enhancement Description: Review Signature block was not behaving as intended on the Print and Download form. The signed review signature block should not be a full SVG signature, but a green signature block with the label "Reviewed By". This was partially fixed in a previous release, and this release fixes this issue in the Print and Download PDFs. As seen in the screenshot below, a Review Signature is on the right, in comparison with the Full Signature on the left.

A large, handwritten signature in black ink that reads "test".

MV2 - New Features

Update the Correspondence UI

Affected Workflow: Cosmetic update. No specific workflows will be affected.

Feature Description: The UI for Correspondence dialog in the viewer has been updated to create more space to view the emails. The list of emails will be shown initially, but will be hidden to create more space once an email has been selected. The user can hit back to return to the list.

Subject
New Employee Intake - Dean Crusk

You have been sent a document to view and sign.

[VIEW DOCUMENT](#)

Hello Team,

As you know Dean is our newest employee (welcome again!), and we still need to update his information in our system.

Dean - please fill out your employee information, and then sign.

MV2 - Enhancements

Optional Forms UI - Bulk Send Update

Affected Workflow: Bulk Send workflows that involve one or more optional forms.

Enhancement Description: Added ability to trigger optional forms from “Bulk Send” compound transactions.
