MV2 UI UPDATES

Display Selected Company in Admin Section

The Company Name is now displayed in the Admin Section. This update will affect all users accessing the Admin Section.

Description: Currently, when viewing the Admin section, there is no indication of what company you are viewing. We've added the company name to the up-right hand corner of the Admin panel.

Access Protection's Phone number update

Impacts all publishers sending document packages

Description: This fix resolves an issue wherein the EAP popup phone number field contains an additional country code.

MV2 Bug Fixes & Updates

Recipient Landing Pages: Recipient Next = Create Signing Package Bug Fix

Affects all workflows utilizing recipient landing pages

Description: A bug fix associated with users editing Landing Pages will be in this release. Previously, when a recipient was editing landing pages with the setting 'Recipient Next= Create Signing Package and Exit', the user was not being directed to the client-specific exit URL when the LPs are completed. This bug fix will now direct users to the exit URL upon completion of the above landing pages.
