4.9.2020

## MV2 UI UPDATES

### CSV Download Enhancement

**Impacts:** Users of AEX leveraging the US Wealth Fidelity Offerings with rights to utilize the “Reports” function. Company Admin will automatically have access to reports. All others will need to request this type of access from their company administrator.

**Description:** When creating a custom report in AEX the column order created in the report will now be reflected in the downloaded CSV file. Previously, the report and column order did not match.

### Show Transaction Events

**Impacts:** MV2 Administrators making changes to transactions/ transaction events

**Description:** In the MV2 Administration Section, Transaction Events will now always be visible no matter how the transaction is configured. One can find this update in the MV2 Administration Section, clicking on → Select a transaction → Edit Workflow. This enhancement allows ALL transaction events in this section to be visible.
